

GRADUATE SCHOOL OF GLOBAL ENVIRONMENTAL STUDIES
KYOTO UNIVERSITY

SPECIAL ADMISSION FOR DOCTORAL PROGRAM
EXAMINATION IN DECEMBER 2017

GUIDELINE FOR INTERNATIONAL APPLICANTS

Admission Policy

1. Our policy

The Graduate School of Global Environmental Studies works towards the current and future health and sustainability of the global environment in two essential ways: first, by training future researchers and practitioners for future environmental careers in academia, management, policy, advocacy and project implementation; and second, by establishing sustainability as the basis of an integrated and interdisciplinary field informed by ethics, science, technology and the humanities that can address the environmental challenges confronting the 21st century.

2. Who are we looking for?

Our goal is to produce graduates who demonstrate excellence and distinctiveness that allows them to impact their chosen fields. We are seeking:

- Future researchers from all academic fields with a keen interest in global environmental problems and their solutions;
- Future internationally-minded practitioners with a deep enthusiasm for environmental management and a sincere commitment to acquiring and implementing the knowledge and practical skills required to tackle environmental problems from the local to global level in every walk of life;
- A diverse body of students from many different backgrounds and perspectives. Our students enter through a variety of admission tracks, including a special admissions program for international students and thesis-track and mid-career admissions options for students with extensive work experience in environmental issues, some of whom may choose to study while continuing their professional careers.

3. Three degree programs offered

The Graduate School of Global Environmental Studies offers master's and doctoral programs in the field of environmental management, as well as a doctoral program in global environmental studies. The admission requirements for each of these programs relate to the objective of the study program provided.

3.1 Global environmental studies

Our three-year doctoral program in global environmental studies fosters researchers capable of grasping the full complexity and reach of global environmental issues and tackling global and local environmental issues using innovative outlooks and methodologies that are drawn from a wide variety of scholarly fields. Applicants to this program should have a master's degree in their chosen study field in addition to English language proficiency and a keen interest in global environmental issues, but exceptions to the master's degree requirement may be made for those with demonstrated professional experience and expertise in a field related to their expected area of study.

3.2 Environmental management

Our two-year master's program and three-year doctoral program in environmental management are designed to foster outstanding and internationally-minded practitioners capable of applying management skills in the search for practical and sustainable solutions to local and global environmental problems. Applicants to either of these programs will need basic academic knowledge of global environmental issues and English language proficiency in addition to a keen interest in environmental management.

The Graduate School of Global Environmental Studies (GSGES), Kyoto University, invites international students to apply for three-year doctoral programs in Global Environmental Studies and Environmental Management through a special admission process called the International Environmental Management Program (IEMP). It is for international students with superior academic records who wish to pursue a graduate degree by taking courses taught in English.

The study areas and supervising faculty available for admissions are listed on pages 4-5. All applicants are required to choose an academic supervisor from the list. You **must** contact the professor or associate professor **prior** to application, in order to request future supervision for your chosen study program and advice with regard to the application process. Detailed descriptions of each study area are also available at:
