

Guided Tour of Kyoto University Experimental Station for Medicinal Plants

The Kyoto University Graduate School of Pharmaceutical Sciences invites foreign students and researchers to participate in a guided tour of its Experimental Station for Medicinal Plants. (An explanation will be provided in English.)

If you wish to participate, please book after referring to the following outline:

Date and Time 1:30 p.m. - 3:00 p.m., Saturday, November 7, 2015

The event will be held even if there is light rain. (In case of heavy rain that would make an outdoor tour difficult, we plan to hold a simple hands-on learning session using plants.)

Upper limit of Participants 50 people

How to Apply For booking, please provide the following details of participants via e-mail or the university's internal mail system:

- Affiliation (department), name, position (student or faculty member), contact details (telephone number and e-mail address)
- If you wish to participate as a group, please provide the names of all members.
 - * Participants are welcome to invite persons from outside the University (family members, friends, etc.). However, the representative of your group must be affiliated with Kyoto University.
 - * When booking via e-mail, please write "Application for Experimental Station for Medicinal Plants Tour" as the e-mail subject.

Deadline Booking requests must be received by Friday, October 30. In the event that the number of registrations exceeds the number of available spaces, participants will be selected by lottery and notified by e-mail.

Points to Note on Day of Tour

- ◇ Participants will be sent a participation certificate by e-mail. Please print it out and bring it with you on the day of the tour. For security reasons, individuals without participation certificates will not be allowed to join the tour.
- ◇ Since the graduate school has no car parking lot for the general public, please use other forms of transportation to travel to the venue.
- ◇ Since the station uses no pesticides or herbicides, it is home to a variety of insects. Please come prepared by wearing long sleeves, trousers, and hats as appropriate, or bringing insect repellent. The graduate school will not be held responsible for any allergic reactions or injuries (including accidents) incurred during the tour.
- ◇ Please wear sports shoes or other comfortable footwear, and avoid high-heeled shoes such as pumps.
- ◇ A staff member will guide you around the station while providing in English an explanation of the medicinal plants and other features. Please follow the instructions of your guide and other staff members.
- ◇ By booking the tour, you indicate your agreement to the above matters.
- ◇ Personal information collected during the application process will be used exclusively for the purpose of contacting participants regarding this event, and such information will not be used for any other purpose.

— **We look forward to your participation.** —
