

生物多様性保全論分野

Division of Biodiversity Conservation

植物／動物を材料とした進化生物学および保全生物学
(人間・環境学研究科・総合人間学部との合同ゼミ)

Evolutionary Biology and Conservation Biology of plants/animals
(see more information at <http://setolab.h.kyoto-u.ac.jp/> for plant science and
<https://sites.google.com/site/knishikawalab/home> for animal science)

生物多様性保全論分野

Key Words: **Biodiversity, Phylogenetic taxonomy, Phylogeography, Evolution, Environmental adaptation, Endangered species, Invasive species, *Ex situ* conservation, Japanese Archipelago, East Asia, Southeast Asia**

Prof. H. Setoguchi

**Assoc. Prof.
K. Nishikawa**

**Assist. Prof.
S. Sakaguchi**

Research Topics

Evolutionary Biology

- Phylogeography and population genetics of plants/animals
- Systematics based on morphological and molecular data

Biodiversity assessments

- Field surveys in Japan and other parts of the world (including Asian countries and Australia)
- Roles of environmental and historical factors on community assembly

Conservation Biology

- Managing endangered species
 - ✓ Genetic tagging of individuals
 - ✓ Genetic introgression caused by human activities
- Conserving plant communities under over-abundance of deer

Members

Staffs

- Prof. Hiroaki Setoguchi
- Assoc. Prof. Kanto Nishikawa
- Assist. Prof. Shota Sakaguchi

What can we do after graduation?

- Continue research as PhD. students
- Work at university, research institutes, museums, governments or private companies (positions as researchers and general officers)
